Legenda

1 – Attacco pressostato differenziale olio
2 – Sensore temperatura scarico
3 – Alta pressione 1/4" S.A.E.–FLARE
4 – Alta pressione olio 1/4" S.A.E.–FLARE
5 – Bassa pressione olio 1/4" S.A.E.–FLARE
6 – Bassa pressione 1/8"NPT
7 – Bassa pressione 1/8" NPT (iniezione liquido)
8 – Tappo filtro olio
9 – Scarico olio
10 – Resistenza carter
11 – Equalizzazione olio (operazione in parallelo)
12 – Equalizzazione pressione (operazione in parallelo)
13 – Carica olio 1/4" NPT
14 – Spia livello olio
15 – Alta pressione 1/4" NPT
DL – Rubinetto di mandata
SL – Rubinetto di aspirazione
(L1) – Valvola solenoide 1° stadio
(L2) – Valvola solenoide 2° stadio

KEY

1 – Electronic oil pressure switch connection
2 – Discharge temperature sensor
3 – High pressure 1/4" S.A.E..FLARE
4 – Oil high pressure 1/4" S.A.E.–FLARE
5 – Oil low pressure 1/4" S.A.E.–FLARE
6 – Low pressure 1/8" NPT
7 – Low pressure 1/8" NPT (liquid injection)
8 – Oil strainer plug
9 – Oil drain
10 – Crankcase heater
11 – Oil equalization (parallel operation)
12 – Gas equalization (parallel operation)
13 – Oil charging 1/4" NPT
14 – Oil level sight glass
15 – Low pressure 1/4" NPT
DL – Discharge shut off valve
SL – Suction shut off valve
(L1) – Solenoid valve 1st stage
(L2) – Solenoid valve 2st stage
